

Julian Agustin Serante

FullStack web developer

Pilar - Buenos Aires, Argentina

Email: julian.serante@gmail.com

LinkedIn: www.linkedin.com/in/julián-agustín-serante-742436124

GitHub: <https://github.com/JulianSerante>

Full Stack Developer with a background in international trade and customs that helped me improve skills such as teamwork, problem solving, organization of time and responsibilities. Specialized in Front-end, Back-end and database technologies. Knowledge in agile methodologies, GIT, data structure, algorithms, CSS frameworks, and software such as Postman and Visual Studio. I have experience working on full-stack projects using technologies such as React, Next.JS, Redux, Redux Toolkit, NodeJS, Express, PostgreSQL, MongoDB and in Scrum methodology. Possess soft skills like Git-Flow, versatility and curiosity.

PROJECTS

Full Stack Web Developer - MarketX

Jun. 22 - Jul. 22 - 2023

Academic experience. Henry Bootcamp

Design and develop an App for buying and selling gaming products that included: authentication, combined filtering, ordering, banning users, sending emails, reviews and scores, among others.

This project was a group effort, and my role in it was primarily focused on designing and developing the home and product rendering, integrating Cloudinary into the back-end, and working on parts of the shopping cart in the front-end.

Languages: Javascript, Typescript, HTML and CSS

Front: Next.Js 13, React, Redux Toolkit

Back: NodeJS, Express

Database: MongoDB and Mongoose.

Repository: <https://github.com/Gabriel20Arr/marketX>

Full Stack Web Developer - Pokedex 2.0

May. 22 - May 22 - 2023

Academic experience. Henry Bootcamp

Designed and developed a Pokemon App that included searches, combined filters, sorting, controlled forms, and publications.

As this was an individual project, my task was to build the entire project from scratch, including the database, back-end, and front-end.

Languages: Javascript, HTML and CSS

Front: React and Redux

Back: NodeJS and Express

Database: PostgreSQL and Sequelize.

Repositories: - Server and database: <https://github.com/JulianSerante/Pokemon-API-app.git>

- Front End: <https://github.com/JulianSerante/Pokemon-Client-app.git>

TECHNOLOGIES

Programming Languages: Javascript, Typescript, HTML, CSS

Libraries:

- React
- Redux
- Redux Toolkit
- Styled Components

Frameworks:

- Next.js
- Bootstrap
- Express

Runtime environment:

- Node.js

Database:

- PostgreSQL and Sequelize
- MongoDB and Mongoose

Tools:

- Git
- Postman
- Visual Studio
- Slack

Agile methodology:

- Scrum
